# 1.

## THE JOURNEY OF BEER.

---

*Beer has developed a strong foothold in modern society; it is after all the drink of the people. It will be there to bring people together socially, to be drank in celebration at hallmark events, or act as a refreshing reward at the end of a hard fought day. But despite its commonality beer remains a drink appreciated by many but not always understood by all. The world of beer goes largely undiscovered and its complexities unnoticed, as does the hard work that went into its making and the history that led to its conception. Undeservedly praise passes it by, not viewed as having the same complexity and depth of the finest whiskey or made with the same craftsmanship of a boutique wine. Perhaps this is its own doing, stemming from its humble 'blue collar' ties deceiving many drinkers to look past its finer qualities. And maybe that's all just part of its charm.*

*Didn't know that beer can have such prestige? Then maybe it's time to try something new. After all it can be very rewarding, it may prove quite satisfying, and it may lead you on a bit of a journey. It would be a shame after all for such simple pleasures to go undiscovered. Ever thought beer can have the sophistication and grandeur of that of a fine wine? Well for an educated beer drinker it does, more so even. So why not try something new and see if it takes you on this path? The first step is to find the right beer and all the rest will fall into place. This beer will engage you, surprising you with its flavour and change your previous perceptions. This beer varies from person to person; there is no universal beer that everyone will love, after all everyone's tastes are different. But that's why we're here, to help you find that beer and start you on your own 'Journey of Beer'.*

*Once you take the first steps you will be surprised by what's ahead. Beer can let you travel the world in a glass providing a sense of place. Ever wondered what summer feels like in Belgium? Or winter in Moscow? Well there are beers that can take you there.*

*Of course a whole new world of flavours will present themselves! From light and grassy to rich and roasty, sweet to tart, tropical to Baltic. You will find yourself describing beers in ways you never thought you could (ever thought you would want to drink a beer described as 'barnyardy'?).*

*But like any journey you don't start at the end, you have to work towards it. Appreciation for some styles takes time, many are designed to be challenging but persist with it and you will be rewarded; and by the time you finish the journey, you might just find yourself right back where you started, but this time with a whole new appreciation for it. So go on, why not try something new?*

*Welcome to the journey of beer. Remember you will never try them all, but that's not what it's about.*

---

**Everything we do,  
we do for beer.**

## 2. OUR EMBLEM.

---

*In history the hexagonal star, or brewer's star, represented several things apart from a religious faith. Firstly, it symbolised purity. Brewers wanted to declare that their beer was pure and free of additives and adjuncts.*

*The star could also be found as a tapping sign outside taverns. To indicate the potential customers that food and drink was available inside, houses and taverns needed to be marked with distinct symbols such as the hexagram*

*In the middle ages, its use was also seen as a protection symbol against bad luck, demons, weapons and fire. Shielding from demons was quite important for brewers. When a brew turned sour, these spirit creatures were usually blamed.*

*The brewer's star is our emblem and represents what we stand for. It is your assurance that at Beer DeLuxe, you will find carefully selected beers that are pure to their style, and free of unnecessary stuff. All accompanied by perfectly matched beer food.*

---

**Everything we do,  
we do for beer.**

### 3.

## LAGER & PILSNER.

---

*The first stop on the journey through beer begins with something you likely already know quite well; lager has after all grown to become the everyman beer for the masses. Originating from the German word lagern, meaning to store, lager styles are brewed using bottom-fermenting yeasts at cold temperatures and are subject to several weeks of conditioning before consumption in order to produce a light, clean and clear beer style. Made mainly with malted barley, but some may use corn or rice grains, you can generally expect some sweet citrus notes that play around with light malt characters. With such light flavour and character lagers are often looked at being the true test of the ability of a good brewer; being such fine and delicate beers with little to hide any flaws behind.*

*Variations of the traditional Pale Lager style have evolved since its origin to include beers with darker colours and stronger malt flavourings but for many the pinnacle style of lager was made back in 1842, in the Bohemian town of Plzen (now part of Czech Republic) when the first Pilsner was brewed. At the time the only beer available was deemed unsatisfactory by the locals who dumped a total of 36 barrels of it down their streets in demonstration of their dissatisfaction. The city council required an alternative and entrusted Bavarian Brewer Josef Groll to produce the solution. The outcome was Pilsner Urquell; a light coloured and clear beer with a strong defining bitter and spicy hop character (most notably that of the Czech grown Saaz hop). German brewers in fear of people drinking Czech beer over their own then created their own Pilsner style and the Munich Helles Lager (meaning bright), both demonstrating some of the same hop characters but only more subdued.*

## 5. WHEAT BEER.

German in origin, wheat beers (heffeweizens) were made as a lighter colour alternative to the beers available at the time giving them the name 'White' beers. Brewed to the strict purity law's of Germany's Reinheitsgebot (brewing law), wheat beers are made from 50-65% malted wheat and exhibit strong banana and clove flavours. Their appearance is cloudy with a more pronounced yeast character than their clearer contemporaries Kristallweizens, which are filtered versions of the same beer and therefore straw golden in colour. Dunkelweisse beers are dark wheat beers with hazy bodies. Sour wheat beers, known as a Berliner Weisse, also exist and are tart and refreshing with low alcohol content and can often have the addition of salt in which case they are known as a Gose.

Belgian wheat beers (known as 'White Ales' or 'Witbier') differ from German wheats mainly through the addition of gruit (herb based mixture) as a substitute for hops to provide bitterness and flavour and also oats to provide a smoother mouth feel. The outcome is beer with clear herbal and spicy qualities from adjuncts such as coriander, juniper and orange peel.

## 6.

# GOLDEN ALE & PALE ALE.

---

*Beer is split into two main branches, lager and ale with the defining quality between them being the yeast used in fermentation. Ales, the older brother of the two, are made with top-fermenting yeasts that work at warmer temperatures whereas lagers use bottom-fermenting yeasts at cooler temperatures and for longer periods. Ales generally are far vaster in flavour than lagers and have a broader range in character.*

*Golden /blond ales mark the first stop for ales in the 'Journey of Beer'. The original of this style was the Kölsch golden ale made in Cologne, Germany which shared many similarities to pale lagers; both being clear golden in colour, balanced and not too complex, but clean, crisp and highly refreshing.*

*Pale ale's trace back to the English city of Burton-upon-Trent and have two widely recognised subclasses - English and American, although many others do exist. English styles have a firm bitterness and a earthy and buttery malt character (see Timothy Taylors Landlord) where as American styles have more hop intensity making them fruitier and bitter with huge hop aromas (see Little Creature's Pale Ale). The original American Pale Ale is the Sierra Nevada Pale Ale which was first conceived back in 1981 and went on to become a pioneer in the world of beer. It introduced Americans to something other than macro American Pale Lagers and inspiring the whole microbrewery movement the world over. And incidentally what is now known as craft beer. Not a bad effort!*

## 8.

# INDIAN PALE ALE.

---

*Despite what the name implies, India Pale Ales are not derived from India. Instead their origin can be traced back to the 1700's when the British sought out to create their global empire and expanded out in colonisation. Of course soldiers, traders and sailors could not be expected to do such tasks without beer (it was a working man's right in these times), but they were faced with the problem of beer turning foul over such long journey's. Alas a solution was found! To solve the challenges of keeping beer fresh and palatable, brewers upped the alcohol content and increased the hop regimen of the Pale Ale's they were brewing for export at the time. Reason being that aside from what hops impart in flavour, they were initially used in beer for their qualities of being a natural preservative (like alcohol) keeping beer fresher for longer. The outcome was the birth of a unique beer style with strong bitterness and floral hop character dubbed the 'India Pale Ale', referring to its export trade.*

*The style went on to be developed and refined over time to become the IPA's we know today. West Coast American breweries are largely responsible for the evolution, pushing the boundaries of how hoppy a beer can be. Brewers are known to over indulge in their love affair with hops intentionally creating unbalanced beers with a overbearing, yet for many, delicious hop character.*

## 10. RED, AMBER, BROWN & ESB.

---

*Red and amber ales are collected together in a fairly loose definition based upon their colour which is indicative of the malt profile. This leaves a large space in what to expect with taste. English style red/ambers are generally malt driven with a caramel and toffee flavour base, while American styles will also exhibit these flavours along with a big hop presence showing more fruity character in flavour and aroma. A similar comparison can be made for Brown ales, English styles being creamy and nutty and American styles being bitter and potentially more aromatic from the hops.*

*ESB's (meaning Extra Special Bitters) are English in heritage and are comparable somewhat to Amber ales but with darker coloured bodies, more bitterness and stronger malt flavours. By modern standards, ESB's are really not all that bitter but are a fine balance between malt and hop!*

## PORTER, STOUT, SCOTCH ALE, AMERICAN STRONG & BARLEY WINE.

---

Porters were the choice tipple for transportation workers (hence the name Porter) during the industrial revolution. Formerly with higher alcohol than most modern Porters, they were known as either X or XX depending on their strength. Porters XX went on to become Stout-Porters, and then finally just Stouts. To taste, Stouts are strong robust vicious black ales with characters evident of heavily roasted malt. Porters are subsequently the milder and subtler older brother to the Stout, where black malts would be used for colour as opposed to roasted ones making beer with a heavy yet smooth body.

Both have many variants in style and flavour, some fruity and sweet, some dry and some creamy. Adjuncts are commonly added to create different flavours and mouth feels such as chocolate, coffee, oats and milk sugar.

Despite their bellowing taste and body, Stout beers historically struggled to last long voyages to foreign pastures limiting consumption through export. This led to the birth of the 'Foreign Extra Stout', a beer style that in a fashion similar to IPA's is brewed to a higher alcohol content (expect around 7%) and with more hops for their preservative qualities. In the 1700's English breweries would ship similar Stout beer to the Baltic area that boasted alcohol volumes as high as 8-11% which would later be coined Russian Imperial Stout's. Modern breweries not to be overshadowed by those of the past have ventured into making Stouts with alcohol contents well beyond 11%, with the highest brewed beer at the time of writing sitting at a whopping 68%!

## 12.

# BELGIAN, TRAPPIST, GOSE & SAISON

---

*Only ten breweries in the world can legally label their beer under the name 'Trappist' and each proudly wears the stamp of it. Six of the ten are Belgian (Orval, Chimay, Westvleteren, Rochefort, Westmalle and Achel), two Dutch (La Trappe & Zundert), one Austrian (Engelszell) and one American (Spencer). In the Sixth Century, Saint Benedict of Italy instructed the Rule of 'ora et labora' (prayer & work) to encourage self-sufficiency within monasteries, where monks would brew and sell beer to support themselves and the local community. Beer brewed by monks following the commandments of 'ora et labora' is today recognised as Trappist beer as long as it holds true to the three commandments of St Benedict. The first commandment being that the beer is strictly brewed by actual Trappist monks or under their supervision in a Monastery, the second that any surplus profit from selling their beer is put into supporting local communities and the third being that monks must always prioritise prayer over work, a challenge for many with such great demand for their beer. Trappist beers are traditional Belgian styles ranging from Blondes to Brown ales, through to Dubbels and Triples and are all bottle-conditioned. (An evolution of live yeast in the bottle, fermenting for a period of time to get the desired result). Trappist's generally exhibit strong fruit characters of different flavours depending on the style of Belgian beer; rich dark fruit for the darker styles and lighter tropical fruits for the lighter styles.*

---

**Everything we do,  
we do for beer.**

# 13.

## LAMBIC, FRUIT & WILD

---

*This chapter marks the final stop in the journey of beer and also the most challenging one yet. Lambic beers are traditionally from the Pajottenland of Belgium found in the Senne River Valley or Brussels (Cantillon Brewery). They are brewed through the art of spontaneous fermentation, where instead of using traditional ale or lager yeast unfermented young beer is stored in large open vats where wild and naturally occurring yeast strains ferment the beer over time. After up to 3 years of maturation the end product will be blended with younger versions of the same beer to make it palatable. This form of fermentation means the character of the beer comes from the yeast residing in the air and therefore the flavour is unique to each brewery.*

*A common Lambic style is the Gueuze which consists of a blend of 1 year, 2 year and 3 year old beer blended in different ratios. The younger portion of the beer will add carbonation while the older part will add depth and flavour producing a beer that to style is very dry, bubbly and tart. Lambic beers can often contain fresh fruit (or fruit syrups and sugars) to flavour the beer that are added once fermentation has begun. The most common examples of these include kriel (cherries), framboise (raspberry) but also cassis (blackcurrant) and peaches (peche) amongst others. Fruit beer also exists outside of Lambic styles, where traditional ales and lagers are complimented with the addition of fresh fruit (see Founders Rubaeus).*

*Wild and Sour ales are beers brewed with traditional ale yeasts and are later contaminated with souring bacteria or yeast strains– most typically Lactobacillus or Brettanomyces. These beers can exhibit the same level of acidity found in some Lambics but also other complexities from the addition of the wild bacteria.*

## 14. CIDER & GINGER BEER

---

*The growth of cider correlates with the growth of apple trees migrating across Europe and Asia with the earliest trace of cider dating back to 55BC when the Romans ventured North into England and found the local Kentish villagers enjoying the apple based beverage. Ciders popularity was largely boosted by it being a safer alternative to water at the time which would generally carry many diseases. But by 9th century AD it was a well-established drink across Europe and in England in particular where it was common for every farm to have its own orchard and press. The South of England, France and Spain are largely credited for perfecting it into the product you see available today.*

# 15. MID, LIGHT & GLUTEN FREE.

---

*With an estimated one in 100 Australians living with coeliac disease, gluten free beers are increasingly sought after. Most beer is made using barley and wheat malt to provide the fermentable sugars. However both contain gluten, meaning barley-based beers are off the menu for people with coeliac disease. Gluten free beers use grains such as millet and sorghum instead. The quality of gluten free beers continues to grow and with the craft beer movement in full swing, beer drinkers have come to appreciate the breadth of flavor in the world of beer. It's never been a better time to savor gluten free beer.*
